EDUCATION

Degree/Certificate	Institute/Board	Year
B.Tech. Computer Science	Jaypee Institute of Information Technology, Noida	2023-2027
Senior Secondary	KCM School, Moradabad	2021-2023

WORK EXPERIENCE

- Data Visualization Intern

June 2025 - July 2025

Cognifyz Technologies

Remote

- Created interactive Excel dashboards, charts, and pivot tables for real-world datasets containing 10,000+ records.
 - Improved data accessibility by 40% and enhanced stakeholder decision-making through comprehensive data visualizations.
- Data Analytics Virtual Intern

June 2025

Deloitte

Remote

- Completed an enterprise-level data analytics simulation focused on forensic technology and applied data science, performing structured data analysis, pattern identification, and insight generation.
 - Built interactive Tableau dashboards for complex data visualization and engineered an automated XML test case generation system, cutting manual testing effort by 60%. .

TECHNICAL PROJECTS

- Codex

TypeScript, Node.js, Socket.IO, Express.js, Docker

GitHub | Live App

- Developed a full-stack real-time collaborative code editing platform supporting 10+ concurrent users, featuring live synchronization, file management, and multi-user collaboration.
 - Implemented a WebSocket-based architecture using Socket.IO, enabling real-time code synchronization, cursor tracking, and user presence indicators with <200ms latency.
 - Containerized application using Docker with multi-stage builds, reducing deployment complexity by 40%.
- JIIT-SmartSched

Node.js, Express.js, React.js,MongoDB,ExcelJS

GitHub

- Design a full-stack timetable management system using React.js (frontend) and Node.js/Express.js (backend) with MongoDB for persistent admin authentication via JWT
 - Implemented a Constraint Satisfaction Problem (CSP) solver algorithm to automatically detect and resolve three types of scheduling conflicts: venue double-booking, teacher overlap, and batch clashes .
 - Engineered an interactive timetable grid featuring drag-and-drop functionality and real-time clash alerts; streamlined rescheduling processes across more than 200 weekly sessions while enhancing overall user interaction speeds.
- Agro-Vision

TypeScript, JavaScript, Python, Node.js, Express, React, Next.js, MongoDB, Vite, TensorFlow

GitHub | Live App

- Reduced server load by 40% by implementing client-side image processing and real-time preview features, improving annotation workflow efficiency.
 - Developed and integrated Python-based ML training and inference pipelines, automating batch inference for 1,000+ images and improving evaluation efficiency by 30% for plant disease detection.
 - Implemented JWT/OAuth-based authentication with Role-Based Access Control (RBAC), securing 100% of dataset operations and managing multi-level contributor permissions.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, TypeScript, Python, C/C++, SQL (PostgreSQL), PHP, HTML, CSS
- **Frontend Technologies:** React.js, HTML, CSS, Tailwind CSS
- **Backend Technologies:** Node.js, Express.js, Socket.IO
- **Databases:** PostgreSQL, MongoDB
- **Tools & Technologies:** Git, GitHub, VS Code, Chart.js, Microsoft Excel, Tableau
- **APIs & Integration:** OpenWeather API, CoinGecko API, JWT Authentication, WebSocket, Real-time Communication

ACHIEVEMENTS

- Programming & Development,Solved 200+ DSA problems (130+ LeetCode, 100+ GeeksforGeeks)

2024-2025
- Refactored Legacy Code,Committed code weekly, identified top three causes of code inefficiencies

2025
